### **UNITED STATES: Richardson leaves Chemoil**

**January 27, 2011**

Keith Richardson, Global Business Development Manager for Marine Fuel for Chemoil, has left the company.

Chemoil has issued the following statement: 'There is no change in Chemoil's senior leadership team. Chemoil's management and staff hail from over 20 countries around the world, and as in any global operations, staff attrition is expected from time to time. We wish Mr Richardson the very best in his new endeavors.'

As previously reported, Chemoil has recently undergone significant changes, with the appointment of Tom Reilly as Chief Executive Officer (CEO) and the acquisition of OceanConnect's bunker business for \$25 million.
