

In January 2009, Chemoil formed an exclusive joint venture with Adani Enterprises Limited to supply marine fuels in India. The new venture, ChemoilAdani, is the largest supplier of marine fuels in the busy Gujarat region. The Mundra Port is its main container and dry bulk port. Nearby Sikka and Vadinar are home to Reliance Industries and Essar Oil's refineries, which are amongst the largest in the world. Shipping companies will be able to realize operational efficiencies from the advantage of both the strategic location and reliable service provided by the combined capabilities of Chemoil and Adani.

### Supply Ports

ChemoilAdani supplies marine fuel oil in Mundra via its expipe facility. Besides Mundra, we supply in the following ports of Gujarat by barge: Kandla, Sikka, Vadinar, and Jamnagar. The barge loading is facilitated by Mundra's dedicated barge berths.

### Barging

ChemoilAdani both owns and charters a fleet of barges of different sizes that are well suited for the different products, locations, and sizes of the receiving vessels. All barges are operated by ChemoilAdani.

LORENZO SEA (7550DWT), AEL1 (3000DWT), AEL2 (3000DWT), KAMAL XXI (1350DWT), HOPE ISLAND I (400DWT), HOPE HIGHLAND II (500DWT), ASTAMUDI (450DWT).

### Terminal and Products

The supply infrastructure based at Mundra Port is owned and operated by the Adani Group, with storage terminal facilities leased from the Mundra Port Special Economic Zone. There is an aggregated capacity of 90,000 cubic meters (cbm) that is available for fuel products storages, which can be increased to 120,000 cbm in line with market demand.

ChemoilAdani's product offerings include IFO 380cst (RMG 380), IFO 180cst (RME 180), and MGO (DMA). All fuels sold comply with ISO8217:2005 and Marpol Annex VI.
